

Serial No.	District and subdivisions.	Rainfall.	PRICE OF COMMON RICE, IN SEERs, PER RUPEE.		Character of the weather, condition of crops, etc.
			This week.	Previous week.	
1	2	3	4	5	6
		Inches.			
15	DARJEELING	0·37	5	5	Maize is progressing well. Fodder and water are sufficient. Cattle-disease exists in places.
	Kurseong ...	0·07	6	6	
	Siliguri ...	Nil	7	8	
	Kalimpong...	0·07	6	6	
16	RANGPUR ...	Nil	7	7½	Rain is badly needed for the growth of standing crops. The price of rice is rising. Rinderpest is reported from Nilphamari and Domar. Fodder and water are sufficient.
	Nilphamari	Nil	8½	9	
	Kurigram ...	0·02	7½	8	
	Gaibandha ...	Nil	7	7½	
17	BOGRA ...	0·55	6½	7½	Sowing of jute continues. More rain is necessary.
18	PABNA ...	0·75	6	6	Fodder is sufficient. No cattle-disease.
	Sirajganj ...	1·92	6½	6½	
19	MALDA ...	0·06	7	7	More rain is wanted. Fodder and water are available.
20	COOCH BEHAR	Nil	8	8	Weather cloudy and hot. Rearing of <i>haimanti</i> seedlings has commenced in places. Condition of standing crops is favourable. Fodder and water are sufficient.
21	DACCA ...	0·90	6½	6½	The recent rain has been beneficial to the standing-crops, namely, autumn paddy, jute and <i>til</i> . Harvesting of <i>boro</i> paddy is still going on. The prices of rice show a tendency to rise. No large import or export. Fodder and water are sufficient.
	Manikganj...	1·66	6½	6½	
	Narayanganj	1·28	6½	6	
	Munshiganj (a)	(n)	6½	6½	
22	MYMENSINGH	1·80	6½	6½	Weather seasonable. Preparation of soil for jute and <i>aus</i> and harvesting of <i>boro</i> paddy continue. The sowings have been postponed in Jamalpur for want of rain. Prospects of standing crops are not very favourable. Fodder and water are available.
	Jamalpur ...	Nil	7½	7½	
	Tangail ...	(n)	(n)	(n)	
	Netrakona ...	1·16	7½	7½	
	Kishorganj...	2·42	7	6½	

(a) Munshiganj being very near to Dacca and Narayanganj, its rainfall statistics are not quoted. To give information regarding the northern part of the district, rainfall figures for Kapasia thana are reported here.

(n) Not reported.

Serial No.	District and subdivision.	Rainfall.	PRICE OF COMMON RICE, IN SEERS, PER RUPEE.		Character of the weather, condition of crops, etc.
			This week.	Previous week.	
1	2	3	4	5	6
		Inches.			
23	FARIDPUR ...	1.43	{ 6½ 7 }	{ 6½ 7 }	Sowing of jute and paddy continues. More rain is urgently wanted. Prospects of standing crops are fair. Fodder is sufficient.
	Goulundo ... (Rajbari).	0.94	6½	6½	
	Madaripur ...	(n)	(n)	6½	
	Gopalganj(a)	Nil	7	8	
24	BAKARGANJ (BARISAL).	0.04	6½	6	Weather seasonable. Prospects of standing crops are fair. Fodder and water are sufficient. Cattle-disease is reported from Patuakhali.
	Pirojpur ...	0.97	7½	7½	
	Patuakhali ...	0.27	6½	6½	
	Dakshin Sha- bazpur (Bhola).	1.09	6½	6½	
25	CHITTAGONG	1.63	{ 5½ 6½ }	{ 5½ 6½ }	Cultivation of <i>panta aus</i> crop is in progress. Prospects of standing <i>rabi</i> crops are fair. Fodder is sufficient. <i>Panga</i> salt is selling at 16 and 9 seers per rupee at Sadar and Cox's Bazar, respectively.
	Cox's Bazar	6.52	7	7	
26	TIPPERA ... (COMILLA).	0.44	6½	6½	Weather cloudy with high winds. The recent rainfall has been beneficial to jute and other standing crops but more rain is needed for ploughing and sowing of autumn crops. Cattle-disease is reported from the South Sadar subdivision.
	Brahman- baria.	1.80	5½	6½	
	Chandpur ...	0.56	6½	6½	
27	NOAKHALI ...	1.84	6	6	Weather seasonable. Rain is badly wanted. Prospects of standing crops are not good and cultivation is being retarded for want of more rain. Fodder and water are insufficient. Cattle-disease is reported from thana. Sudharam.
	Feni ...	1.20	6½	7½	
28	CHITTAGONG HILL TRACTS.	4.55	7	7	Prospects of standing crops are unfavourable. Fodder and water are sufficient.
29	TRIPURA STATE.	1.81	5½	5½	Weather seasonable. Jute is selling at Rs. 5 to Rs. 6 per maund and cleaned cotton at Rs. 18 to Rs. 25. Fodder and water are sufficient. Cattle-disease is reported from one division.

* Burma rice.

(a) The rainfall at Haridaspur which is very near to Gopalganj is shown here.

(n) Not reported.

DISTRICT REPORTS ON WEATHER AND CROPS

For the week ending on the 10th May 1922.

Summary.—During the week moderate rain fell in most of the northern districts. Elsewhere the fall was generally light. More rain is needed for the agricultural operations. Prospects of standing crops are fair. The average price of common rice for the Province has risen by about 0·3 per cent. as compared with that of the previous week.

Serial No.	District and subdivision.	Rainfall	PRICE OF COMMON RICE, IN ANNAS, PER RUPEE.		Character of the weather, condition of crops, etc.
			This week.	Previous week.	
1	2	3	4	5	6
1	24-PARGANAS	Inches. 1·02	5	5	Lands are being prepared for aus paddy and jute. Effects of weather on crop are good. Fodder and water are sufficient, but there is a dearth of drinking water in parts of Diamond Harbour.
	Diamond Harbour.	0·98	6½	5½	
	Barrackpore	(n)	(n)	(n)	
	Barasat ...	0·40	5½	5½	
	Basirhat ...	0·78	6½	5½	
2	NADIA ...	1·40	6½	7 7/16	Weather hot. Recent rain has facilitated the sowings of jute and paddy, but more rain is wanted. Cattle-disease is reported from Tehatta and Gangani thanas.
	Kushtia ...	1·11	6	6½	
	Meherpur ...	0·94	6½	7	
	Chuadanga ...	2·35	7½	7½	
	Ranaghat ...	0·47	6½	6½	
3	MURSHIDABAD	2·40	6½	6	Prospects of standing crops are fair. Harvesting of boro paddy has commenced. Rinderpest is reported from Mirzapur thana in Jangipur. Fodder and water are sufficient except in some parts in Lalbagh and Kandi.
	Lalbagh ...	2·88	5½	5½	
	Jangipur ...	0·98	6½	6½	
	Kandi ...	4·47	6½	6½	
4	JESSORE ...	1·27	8	8	Ploughing and sowing of fields are proceeding. More rain is wanted in places. Export reported from Jhenidah and Bongaon. Fodder is sufficient but water is still rather scarce.
	Jhenidah ...	0·81	7½	7½	
	Magura ...	1·35	7½	7½	
	Narail ...	0·59	7½	7½	
	Bongaon	1·31	7½	7½	
5	KHULNA ...	0·18	7	7	Weather seasonable. More rain is needed. Sowing of aus paddy and jute has begun. Fodder is sufficient but water is still scarce. Export of rice is reported from Bagerhat
	Satkhira ...	0·70	7	7	
	Bagerhat ...	0·38	6½	6½	

(n) Not reported.

RESOLUTION ON THE REPORTS ON THE MUNICIPAL ADMINISTRATION OF CALCUTTA FOR THE YEARS 1918-19, 1919-20 AND 1920-21.

GOVERNMENT OF BENGAL.

LOCAL SELF-GOVERNMENT DEPARTMENT.

Local Self-Government.

CALCUTTA, THE 19TH MAY 1922.

RESOLUTION- No.3081M.

READ—

The reports on the municipal administration of Calcutta for the years 1918-19, 1919-20 and 1920-21, together with the reviews of the reports recorded by the General Committee and the Corporation.

Introductory.—This resolution deals with the administration of the Corporation of Calcutta during the three years ending the 31st March 1921.

In their previous triennial review, Government observed that its large revenue balances had enabled the Corporation to surmount the financial difficulties which the war had created. No restoration of normal conditions is however yet in sight; trade and industry are depressed and the universal rise in prices have added permanently to the establishment charges of the Corporation and perhaps permanently to the cost of its works. A loan policy has again become practicable, but loan charges have enormously increased, while the remaining borrowing capacity of the Corporation is largely earmarked for its costly water supply and drainage outfall schemes. The rates constantly grow, the annual increase being about Rs. 5 lakhs, but the new water supply scheme alone—in working expenses and loan charges—is expected to absorb nearly Rs. 20 lakhs of revenue a year.

Increased establishment charges, organization and expansion of primary education and the enhanced cost of the city services, add to the bill. If the Corporation is to continue the progressive and enterprising policy of the past decade, an increase in the rates would in the near future appear inevitable. Nevertheless, at the end of the triennium under review, the closing balance of the Corporation still reached the high figure of Rs. 46 lakhs, which has for the moment enabled it to defer the raising of the rates.

The Calcutta Municipal Bill of 1917 and the shorter Bill which was framed subsequently, were both dropped. The constitutional provisions of the former Bill have since been modified, and at the time of writing, this comprehensive consolidating measure is pending before the Legislative Council.

2. Elections.—The seventh general election of Ward Commissioners which was held on the 21st March 1921, evoked very little enthusiasm. There were 49,060 voters with 124,271 votes, as compared with 35,153 voters and 90,907 votes in 1918. The voters however showed little keenness and the votes cast were only 38 per cent. of the voting power of the contested wards as against 53 per cent. in 1918. In 15 wards out of 25 there was no contest at all, and it was only in three wards that any real keenness was evinced. In 18 wards the sitting members were returned and 11 of them without any opposition. The newly constituted body of Ward Commissioners consists of 23 Hindus and 2 Jews. No European, Anglo-Indian or Muhammadan candidates offered themselves for election.

3. Census.—The census which was taken on the 18th March 1921, was disappointing. Including the port and the maidan, the preliminary total for Calcutta was 903,173 as against 896,067 in 1911, an increase of less than 1 per cent. against 5·7 and 24·3 per cent. at the two preceding censuses. The accuracy of the census was challenged by the Corporation which had further enquiries made to test the figures in certain areas where the census had showed a decrease of population.

The census of Calcutta has always presented peculiar difficulties—more especially in the wards in which Europeans preponderate.

4. Accounts.—The resumption of activity in nearly all the departments of the Corporation resulted in a considerable increase of work in the Accounts Department of the Corporation. Greater attention was paid to the verification of stocks and shares and a board of visitors was appointed in 1919-20 to inspect periodically the Store Depôts of the Corporation.

5. Revenue.—The actual receipts of the Corporation rose from Rs. 1,35,61,519 in 1918-19 to Rs. 1,52,22,180 in 1920-21 or by nearly 2·2 per cent, while the payments rose from 1,27,74,868 to Rs. 1,59,39,378, or by 24·7 per cent. Though the expenditure in 1920-21 exceeded the receipts by nearly 7½ lakhs, the triennium closed with an actual balance of Rs. 46,09,450. On the basis of assets and liabilities the income in 1918-19 was Rs. 1,35,69,257 and the expenditure Rs. 1,26,51,363, while in 1920-21 they amounted to Rs. 1,52,03,872 and Rs. 1,61,62,519, respectively, the closing balance being Rs. 34,01,257.

6. Loans.—Loans aggregating Rs. 54,54,700 fell due during the triennium and were repaid partly out of accumulations from the Sinking Fund

and partly by raising further loans to the extent of Rs. 35,73,200. The following new loans were sanctioned for capital works :—

					Rs.
1919-20	{ 24,92,500
					{ 21,24,500
1920-21	54,50,000

Of these loans it was not found necessary to raise the loan of Rs. 21,24,500 which was intended to serve as a reserve in case the realisation from the sale of surplus lands fell short of expectations. Of the other two loans for capital works, Rs. 35,73,200 only were raised in the aggregate, as it was found impossible to raise the loans on advantageous terms and it was eventually decided to keep in abeyance certain projects which were not urgent and to concentrate the future resources of the Corporation on the scheme for the improvement of the water supply.

The loan funds opened with a balance of Rs. 6,14,797. The total sum credited to the funds (*e.g.*, on account of loan receipts, sales of surplus, etc.) within the triennium amounted to Rs. 1,12,03,968 and the expenditure to Rs. 83,46,886. The balance left at the end of the period amounted to Rs. 34,71,879.

The net indebtedness of the Corporation on the 31st March 1921 excluding the accumulations in the Sinking Funds was Rs. 5,24,12,300 as against Rs. 4,75,17,000 on the 31st March 1918. This represents an increase of Rs. 49,58,300 in the debts of the Corporation compared with a decrease of Rs. 15,97,315 in their liability in the preceding triennium.

7. **Sinking Fund.**—The balance at the credit of the Sinking Funds on the 31st March 1921 amounted to Rs. 2,159 in cash and securities of the face value of Rs. 63,40,500 which at market value amounted to Rs. 42,55,233. To make good the temporary depreciation in the Sinking Funds the Corporation was required to pay a sum of Rs. 9,96,838 into fund during the period under review. The total loan charges on the outstanding debt of the Corporation on the 31st March 1921 amounted to Rs. 34,82,681 as against Rs. 31,82,980 on the 31st March 1918.

8. **Assessment.**—The assessed annual valuation of the city continued steadily to rise and stood at the end of the year 1920-21 at Rs. 5,60,60,063 as compared with Rs. 4,80,98,516 at the end of the year 1917-18. Of the total increase nearly half of the amount was obtained from general revision of assessment and the rest from revaluation and intermediate valuation of new constructions. The new assessment of the Port Commissioners' property yielded—after appeal—an increase of over Rs. nine lakhs in the annual valuation.

The steady increase in the valuation of the city will it is hoped help the Corporation to a considerable extent in financing the costly water supply and drainage schemes and other improvement schemes of importance.

9. **Collection.**—The high standard of collection reached in previous years was well maintained in the collection and license departments. In 1920-21 the percentage of collections for the consolidated rate calculated on the nett demand reached the figure 99.93, which is one of the highest on record. Similarly, the percentage of collection for the license department rose as high as 99.38 in the year 1918-19. The number of licenses issued and the record collections in the license department in 1920-21 in spite of the unfavourable conditions which have prevailed during the year, point to the steadily increasing prosperity of the city.

10. **Water-supply.**—The average quantity of water supplied to the city during the last year of the period under review rose to 68 million gallons per day (37 million filtered and 31 million unfiltered) with an average consumption of 74.2 gallons per head per day (40 filtered and 34.2 unfiltered). In accordance with the recommendations of a special committee appointed to

consider the question of improving the filtered water-supply of Calcutta, Mr. St. George Moore, an Engineer of considerable waterworks experience, was brought out from England to advise the Corporation on the subject. The scheme that was first drawn up by Mr. Moore was rejected by the Corporation on the score of cost. Eventually it was decided that the unfiltered water-supply should not be abolished and that the scheme be modified so as to provide for 70 million gallons of filtered and 40 million gallons of unfiltered water daily with adequate control of the filtered water supply by metering so as to maintain a continuous water-supply at a minimum terminal pressure of 40 feet. The scheme, which it is estimated will cost over two crores of rupees and will take five years to complete, has since been sanctioned by Government. The Minister trusts that as the deliberative stage in connection with the improvement of the water supply which began so far back as 1913 has now been satisfactorily concluded, there will now be no delay in the execution of the scheme.

11. **Drainage.**—In the last resolution it was observed that the extension of its underground drainage system into the suburbs was perhaps the most pressing task which now confronted the Corporation and it is satisfactory to find that substantial progress in drainage works has since been made. Several of the schemes undertaken will go far to remedy the insanitary conditions which prevail in the outlying parts of the municipality. The sewerage of certain roads west of Tolly's Nullah—a long-deferred advance—was undertaken and in all nearly 17,300 feet of sewers were constructed during the triennium. The completed sewers will drain portions of wards XXIII, XXIV and XXV.

The scheme for the drainage of the area west of the Kidderpore Docks and the Chetla rice mill area and the construction of the main outfall sewer in connection with the Improvement Trust Schemes VIII and VIIIA were commenced. Other important works taken in hand during the period were the construction of the main outfall sewer which forms a part of the scheme for sewerage the area west of Hazra Road and the sewer to relieve the flooding in the Bhowanipore area. The Corporation besides completing certain works of minor importance continued the survey of the town sewers, and altogether 80 miles of sewers in the city and suburbs were examined. The structure of these sewers was found to be in a good state of preservation.

The decay of the Bidyadhari river which forms the drainage outfall of Calcutta is again compelling anxious attention. The spill areas which were opened out with the view of giving a better scour to the river have failed to fulfil expectations and regular observations go to show that the silting of the Bidyadhari continues. The problem of the ultimate disposal of the drainage of the city is now becoming urgent and it is recognised that in any case the pumping of storm water will be necessary within a very few years.

12. **Roads and lighting.**—Expenditure on road repairs and other road works has been heavy and indeed the improvement of road surfaces is one of the outstanding features in the record of municipal progress.

The value of asphaltum as a road surface has been established and some important thoroughfares in northern Calcutta have since been paved with this material. Bituminous surfaces, broad, clean footpaths, the paving of narrow lanes and gullies, the laying of stone setts in streets which carry heavy traffic, and greater attention to the repairs of ordinary macadamized roads—these things have to some extent effected a transformation of the conditions of a decade ago.

The efficiency of public lighting was well maintained and further progress was made with the scheme for the conversion of oil lights and the erection of additional gas lamps. Minor economies and improvements were also made in street lighting.

13. **Markets.**—The municipal markets (four in number) continue to be a valuable asset of the Corporation and a great public convenience. The total receipts they yielded were nearly Rs. 9 lakhs, and after meeting establishment and other charges including 5 per cent. interest on

the capital outlay, the Corporation made a net profit of Rs. 1½ lakhs during the year 1920-21. These institutions also enabled the Corporation to keep some kind of check on the prices of commodities as they soared up towards the end of the war and to restrict the extent of food adulteration.

Various additions and improvement were made in these markets, and a self-contained block for the sale of pure milk with a testing room for the examination of samples and a laboratory and hot water installation was constructed in the Sir Hogg Stuart market. A new building has been added to this market and the acquisition of land has been sanctioned for its further extension. The construction of a one-storeyed building and a chandney in the northern section of the College Street market was taken in hand towards the close of the triennium. The striking success of these institutions has led to proposals being brought forward for the establishment of other markets and a project to establish a municipal market, in place of the Mowlali Bazar, on the Lower Circular Road was approved and the acquisition of land sanctioned.

Minor improvements were also made in the private markets the conditions of which are still far from satisfactory.

14. Improvement works.—No comprehensive improvement scheme was undertaken within the triennium. But measures which go far to improve the amenities of the city such as construction of new roads, widening, kerbing and channelling of existing roads, and paving narrow passages with brick-on-edge were extensively undertaken. The park for purdanasheen ladies in the north of the town may be said to have justified itself, though full advantage has hardly yet been taken of the opportunities which it affords.

15. Sanitary improvement.—High prices and the scarcity of materials have made it impossible for the Health Department to enforce with any uniform rigour their requisitions for sanitary improvements in private premises.

Nevertheless the improvement of insanitary buildings in Malanga Lane and selected areas in Districts I and II has been steadily pressed on.

Many bustees were improved by the opening up of roads and the provision of sanitary conveniences, while some bustees were finally swept away.

16. Conservancy.—Extensive improvements were made in the permanent way and the rolling stock of the municipal refuse railway which had fallen into disrepair, and the chances of temporary break-down in the working of the railway have been reduced. The Minister is glad to observe that the Corporation has taken a definite step towards the introduction of motor traction for the removal of refuse in Calcutta. Five motor lorries have been purchased and have been placed in commission since the close of the triennium and a system of sunken bins has also been introduced for the temporary deposit of refuse. The service is not cheap, but if its gradual extension ultimately makes it possible to abolish the refuse railway, the citizens of Calcutta are not likely to grudge the cost.

17. Public Health.—In 1920-21, there was some improvement in public health, the previous year having been one of the worst on record, but as a whole, the triennium appears to have been an abnormal one from the health point of view. There was increased mortality under all heads, but it is thought that the disastrous pandemic of influenza in 1918 helped to sap the vitality of the people and thus opened the way to other diseases.

The death rate rose from 24.7 in 1918 to 39.3 in 1920-21 per thousand of population, while the birth rate fell from 20.9 to 17.1 in the last year under review. The decrease in births is due to a large extent to defective registration and to a certain extent to the general unhealthiness of the period under review. A special census of children in a particular ward went to show that nearly 13 per cent. of the children born in Calcutta has escaped registration. It is reported that this figure corresponds closely to the difference between the birth rate for the year and the quinquennial average. To remedy this defect the Chairman proposes to overhaul the system of registration and it is hoped the next return will show a better result.

The infantile death rate also rose to an abnormal figure and the expectation of a decreased mortality has not been realised. It rose from 239 per thousand births in 1917 to 357 and 386 in the last two years of the triennium. Defective registration has helped to inflate the returns. But there is no doubt that the general unhealthiness of the period has had also its effect. As usual the Jorabagan ward showed the worst record, and in 1918 over 50 per cent. of the infants in this ward perished—an appalling result. About 35 per cent. of infantile deaths occur in the first week of life.

The Corporation Lady Health Visitors and Midwives continued to do excellent prenatal and child welfare work. Amongst the children delivered and attended to by them, there was a mortality of 43 per 1,000 in the first ten days of life and 24.9 among the older infants. This compares very favourably with the corresponding general infantile mortality of 117 per and 283.9 per 1,000. Provision was also made in this connection for the distribution of warm clothing and dried milk in deserving cases. The result achieved shows that there is considerable scope for the development of maternity and child welfare work and the Minister is glad to observe that the Corporation has approved a scheme for its extension. The scheme provides for four child welfare centres and in addition two maternity homes. A project for a home in the northern quarters at an estimated cost of Rs. 4,14,587 has since been sanctioned and a suitable site has been acquired.

The inequality of the death rate amongst males and females which appears to be a fixed feature of the vital statistics of Calcutta continued and the rate of 19.8 (males) and 32.1 (females) per mille for 1917 rose to 33.8 and 50.9 in the last year of the period under review.

The marginal figures show the mortality from influenza, plague, small-pox and tuberculosis.

Year.	Plague.	Influenza.	Small-pox.	Tuberculosis.
1916	210	4,115	545	1,626
1919	224	2,243	1,270	1,849
1920	23	1,666	2,925	2,120

The increased mortality from tuberculosis may to some extent be an aftermath of the ravages of influenza. Plague and cholera appeared in an epidemic form and the usual quinquennial epidemic of small-pox broke out in November 1919 after some premonitory outbreaks and lasted till June 1920. The mortality from cholera rose from 866 in 1917 to 3,688 in 1919. Although the infection was in a great measure spread by the pilgrims returning from Saugor Mela, yet the more severe prevalence of the disease in the riverain wards clearly indicated that the use of unfiltered river water is a potent means of infection. The mortality from malaria also showed an upward trend and rose from 984 in 1917 to 1,289 in 1920.

It is satisfactory to find that there has been a steady decrease in the percentage of *ghee* found adulterated since the passing of the Calcutta Municipal (Amendment) Act of 1917 and that the quality of *ghee* found in wholesale and big retail shops has improved. *Ghee* with which sweetmeats are prepared continues, however, to be of an inferior quality. Mustard oil was found to be adulterated with oil educed from pakra seed, which contains prussic acid. The public were warned against this new evil and effective steps were taken for the supply of pure mustard oil to the public. Vigorous measures were taken to secure the inspection of shops and to intercept unwholesome foodstuffs and adulterants coming from outside.

18. **Education.**—The total amount of aid given by the Corporation to educational institutions of all kind increased from Rs. 85,528 in 1917-18 to Rs. 1,40,030 in 1920-21; this included indirect grants in the shape of exemption from rates amounting to Rs. 30,943.

The improvement of primary education in Calcutta has at last taken definite shape. The scheme will involve a capital expenditure of about Rs. 21,75,000 and a recurring expenditure of approximately Rs. 4,75,000 when in full operation.

The project provides for 15 model schools and a training college for teachers and for the gradual and systematic improvement first of the existing schools and then of the new schools that may be established in the future. Government have agreed to contribute a total sum of 17 lakhs towards the capital cost of the scheme besides undertaking to pay Rs. 10,000 a year for three years and to place at the disposal of the Corporation the annual grant that is now spent on primary schools (Rs. 30,000).

19. **Personnel.**—Mr. R. M. Chatterji, Vice-Chairman, died in January 1919. He had been Vice-Chairman since 1914; and had rendered conspicuous services to the Corporation in responsible posts for nearly thirty-two years.

Rai Charu Chandra Chatterji (Secretary) Bahadur was appointed Vice-Chairman, and in February 1921 became Deputy Chairman. The latter post had previously been held by Mr. S. K. Sawday, I.C.S., Mr. Gurner, I.C.S., and Mr. Stork, I.C.S. Mr. Donald and Mr. Payne—apart from two short periods in which Mr. Gurner acted—held the office of Chairman at different times during the triennium. The Minister desires to record his appreciation of the excellent work of all these officers and in particular to recognize once more the invaluable services rendered to Calcutta by Mr. Payne on the latter's retirement from the Corporation. He would also pay a tribute to the Municipal Commissioners who as a body have worked loyally and well for the welfare of their great city.

By order of the Government of Bengal

(Ministry of Local Self-Government),

S. W. GOODE,

Secretary to the Government of Bengal (offg.).

MONTHLY WEATHER AND CROP REPORT OF BENGAL FOR APRIL 1922.

I. Character of the Season.—During the month under review the rainfall throughout the Province was scanty and greatly in defect of the normal. The usual rainfall statement is appended.

II. Progress of Agricultural Operations.—Harvesting of spring crops was approaching completion. Agricultural operations for jute and paddy were being delayed owing to prolonged drought.

III. State of Standing Crops.—The general condition of the standing crops was reported to be unsatisfactory.

IV. Prospects and Probable Outturn.—The prospects of jute and other autumn crops are not hopeful.

V. Damage to Standing Crops.—Prolonged drought caused considerable damage to the standing crops in many parts of the Province.

VI. Condition of Agricultural Stock.—The condition of livestock was reported on the whole to be fair. Cattle-disease was, however, reported from parts of Nadia, Murshidabad, Khulna, Burdwan, Bankura, Hooghly, Rajshahi, Jalpaiguri, Darjeeling and Rangpur.

VII. Failure of Pasturage and Fodder.—Excepting in parts of Jessore, Khulna and Bankura no scarcity of fodder and water was reported from any part of the Province.

VIII. Prices of Food-grains.—During the second fortnight of the month the prices of the common rice of the cheapest quality fell in three districts, rose in sixteen and remained stationary in the rest. The price ranged from 5½ seers per rupee at Hooghly to 8 seers per rupee at Jalpaiguri.

IX. Condition of Agricultural Population.—The condition of agricultural population was reported to be fair.

J. C. Roy,

for Director of Agriculture, Bengal.

Dacca, the 12th May 1922.

DEPARTMENT OF AGRICULTURE, BENGAL.

Final Forecast of the Wheat Crop of Bengal, 1921-22.

(NOTE.—On an average of the five years ending 1919-20, the area under wheat in Bengal has represented some 0·4 per cent. of the total area under wheat in India. The ratio of the irrigated wheat acreage to the total wheat acreage in (a) British India and (b) in the territory now reported on, has, in the five years ending 1919-20, averaged (a) 42·3 and 16·0 per cent., respectively.)

Character of the Season.—At the time when the special forecast was issued, the harvesting of the crop had already advanced considerably. The prevailing dry weather has since been favourable for threshing.

Area Sown.—According to the estimates of the District Officers, the total area under wheat amounts to 124,100 acres this year, against 116,900 acres last year.

Outturn.—From the District Officers' estimates, the provincial outturn works out at 68 per cent. of the normal this year, against 86 per cent. last year.

Taking the normal yield to be $8\frac{1}{2}$ maunds per acre, the gross yield of the crop for the province is estimated at about 26,300 tons, against 31,400 tons last year.

At the end of April, the average wholesale price of wheat at the principal marts of the province was Rs. 6-12-10 per maund or about 0·7 per cent. and 2·2 per cent. lower than the prices ruling at the corresponding periods of last year and in the year preceding respectively. The average wholesale price of common rice at the principal marts, on the other hand, was Rs. 6-2-7 or about 7·5 per cent. and 4 per cent. lower than the prices at the corresponding periods of last year and the year preceding respectively.

G. EVANS,

Director of Agriculture, Bengal.

DARJEELING.

The 13th May 1922.

APPENDIX I.

Final Forecast of the Wheat Crop of Bengal, 1921-22.

District.	Estimated normal area under the wheat crop.	Estimated area under wheat.		Taking 100 to represent the normal, what would be the average outturn per acre cropped.		Date on which the harvesting of the crop was begun this year and whether that date was early, normal or late.	Remarks by District Officers.
		Last year (1920-21).	This year (1921-22).	Last year.	This year.		
	Acre.	Acre.	Acre.				
Nadia ...	23,100	13,500	13,100	50	43	Beginning of March. Normal.	The entire cessation of rain all through affected the crop causing reduction in the outturn considerably.
Murshidabad ...	69,300	22,300	21,600	92	67	March to beginning of April. Normal.	The weather was not favourable. Continued drought stunted the growth of the crop and caused damage to the extent of four annas.
Jessore ...	2,300	800	900	75	50	March. Normal ...	The weather was not favourable and the growth of the crop not good. Much damage was done by drought.
Burdwan ...	2,000*	2,000*	2,300	75	67	The weather was not favourable owing to want of rain. The outturn is much below the normal.
Birbham ...	4,100	3,000	3,100	92	50	Beginning of March. Normal.	The weather has not been favourable. The decrease in outturn is due to drought.
Bankura ...	3,600*	3,600*	2,500	67	75	Middle of February. Normal.	The decrease in area is due to insufficient rainfall in November. The weather was fair. The outturn was below the normal owing to insufficient moisture in the soil.
Midnapore ...	800	800	800	55	75	March. Normal ...	The weather was not favourable. The fall in outturn is due to drought.
Hooghly ...	2,400	1,700*	1,700*	67	67	End of March. Normal.	The weather was not favourable. The outturn was much below the normal owing to absence of rain.
Rajshahi ...	18,600	8,300	8,200	100	83	Later part of March. Normal.	The increase in area was due to increase in prices. The weather was unfavourable for want of rain. The outturn is below the normal for want of rain which caused damage to the extent of two annas in the Nator subdivision.
Dinajpur ...	1,400	1,300	1,300	61	67	Middle of March. Normal.	The outturn is expected to fall below the normal owing to unfavourable weather.
Jalpaiguri ...	800	600	800	92	92	Second week of March. Normal.	The weather was favourable. The outturn was a little below the normal owing to uneven distribution of rainfall.
Darjeeling ...	4,500	2,500	2,500	83	83	April. Normal ...	The weather was fairly favourable.
Rangpur ...	2,000	2,400*	2,400*	100	100	First week of March. Normal.	The weather was favourable and a normal outturn was obtained.
Bogra ...	100	300	300	80	70	Third week of March. Normal.	The weather was not favourable. The outturn was below the normal.
Pabna ...	16,000	7,000	6,200	67	50	End of March. Normal.	The weather was favourable for cultivation but continued drought since the sowing time retarded the growth of the crop. About half the crop was damaged by drought.
Malda ...	60,000	40,000	48,000	100	75	Middle of March. Normal.	Continued drought retarded the growth of the crop to some extent, but the rain in February somewhat improved the condition. Some damage was caused by drought. The outturn fell below the normal for want of rain.
Dacca ...	4,100	4,300	3,500	65	60	Ditto ...	Want of timely rain affected the growth of the crop and caused some damage. The outturn was much below the normal.
Mymensingh ...	400	...	300	...	83	Ditto ...	The weather was unfavourable owing to drought which damaged the crop to the extent of 17 per cent.
Faridpur ...	2,700*	2,600	2,800	55	40	March. Normal ...	The crop suffered considerably especially in the Balundo subdivision owing to continued drought which reduced the outturn.
Total Bengal ...	319,400	116,900	124,100	86	88		

* Conventional area.

APPENDIX II.

Abstract statement of estimated acreage and outturn of the Wheat Crop of Bengal, 1921-22.

Province.	AREA (IN ACRES).					YIELD (IN TONS).								
	Of current year's crop (1921-22).	Of previous year's crop (1920-21).	Average of preceding—	Percentage by which column 2 exceeds (+), or is less than (-), area in—		Estimated yield of current year, i.e., of area in column 2.
